

Keep your school safe  
with Electrostatic  
Fogging

**The fastest  
and most  
effective way  
to sanitise  
and disinfect  
your school**

# Rapid school sanitisation at the touch of a button.

As a leader in the education sector, you constantly have to worry about the safety of your staff and students whilst maintaining your school to the highest levels.

Electrostatic fogging may seem a bit of a mouthful, but it has some excellent benefits to combat bacteria, COVID or any other nasty viruses!

Unfortunately, over the last 18 months, you've had to deal with a pandemic meaning there is even more for you to think about. COVID has revealed a lot of common issues many schools are now facing such as:

- Closures due to a COVID outbreak
- An urgency for greater safety of students and staff
- Increased cleaning costs
- Constant need to sanitise high-touch surfaces
- The need for COVID testing areas in schools

School holidays present a perfect opportunity to fully sanitise your school, ensuring a safe and clean environment for the new term.

**Our Electrostatic Fogger Service offers that solution.**

It's a tool used by the NHS to deep clean entire spaces and works by using large volumes of air at a low pressure which transforms liquids into tiny droplets. These droplets are then dispersed into the atmosphere making them perfect for the application of sterilisation and disinfecting. It's quick, easy, and most importantly, cost effective.

# Benefits of Electrostatic Fogging.

Electrostatic fogging kills all bacteria, including COVID 19 or any other nasty viruses! Other benefits include:

- **A thorough clean** – Electrostatic fogging can sanitise even the hardest of surfaces, leaving your classroom bacteria-free.
- **Low downtime** – If a COVID case is found in your school, our electrostatic fogging service can clean a classroom in under 15 mins and be ready to use in as little as 1 hour after being treated.
- **Cost-efficient** – We know it may sound expensive but from as little as 49p per sq metre, you will receive a quicker and deeper clean, saving you money in the long run and making your cleaning process more efficient.
- **Touchless application** – There is no need to touch or wipe school tables as our fogger provides a fast and effective application method.
- **Regular fogging helps to repel all bacteria** – not just COVID. Our electrostatic fogger helps to terminate colds, flu, norovirus, and other harmful bacteria to ensure the safety of your staff and students, keeping your school running safely.
- **15 % Holiday discount** - It shouldn't cost the world to keep your staff and students safe, which is why we are offering a 15% discount on our electrostatic fogging service over the holidays.

## **Customer Testimonial**

"Unfortunately, our school was recently in the position of having a significant number of positive Covid cases. As a school we needed to do as much as possible to reduce the ongoing risk for the rest of our community. In addition to our regular cleaning, they very quickly arranged for fogging of the school to be undertaken. They arrived on site as agreed and methodically worked through the school, fogging in every room. The peace of mind it brought to us knowing that this service had been carried out cannot be underestimated and as a school we would like to thank TLC for their prompt and efficient service."

**Cathy Wilks, School Business Manager**  
**Hazel Grove Primary School**

# Eliminate unwanted bacteria and protect your people.

Our electrostatic fogging service is a super-efficient way to keep on top of your schools cleaning schedule whilst keeping your staff and students safe.

If you feel that your school could benefit from our electrostatic fogging service, then get in touch! We would be happy to help.
